

LEARNING PATH CERTIFICATE

Qt Academy

This certificate is awarded to
Prosenjit Majumder Joy

For successfully completing
Creating Qt Quick User Interfaces

During this path, you have learned the fundamentals of creating Qt Quick user interfaces with QML, gaining the essential skills needed to build dynamic, responsive applications. From objects and property bindings to working with Qt Quick Controls and custom components, you are now equipped to design modular, interactive user interfaces. You've explored layout techniques, styling approaches, and the basics of Model-View architecture, preparing you to create maintainable applications.
